

The Rocky Horror Show

Scenic Concept Model Box Presentation

Andres Ramirez

Overview

-To show the drastic change in worlds from Brad and Janet's colorful cartoon-like environment, to that of Dr. Frank-n-furter's that is dark, mysterious, grand, theatrical, and technologically advanced.

This is shown by a starting scene that is very cartoon-like with bright colors, simple shapes, and basic details, in contrast to the Dr. Frank-n-furter's that has dark warm colors, textures, realistic details, and bizarre traits such as a technologically advance-looking lab, and over-seeing stain glass window of Adam and Eve that represents the theme of temptation, and even a light-up staircase embedded in the castles walls that pops out when ever Dr. Frank-n-furter needs to make a big entrance.

Another detail is the famous Rocky Horror Show lips -projected on the top center of the proscenium- that help narrate the story.

Spaces

dreamy, cozy, warm, safe

spacious, mysterious, warm, creepy

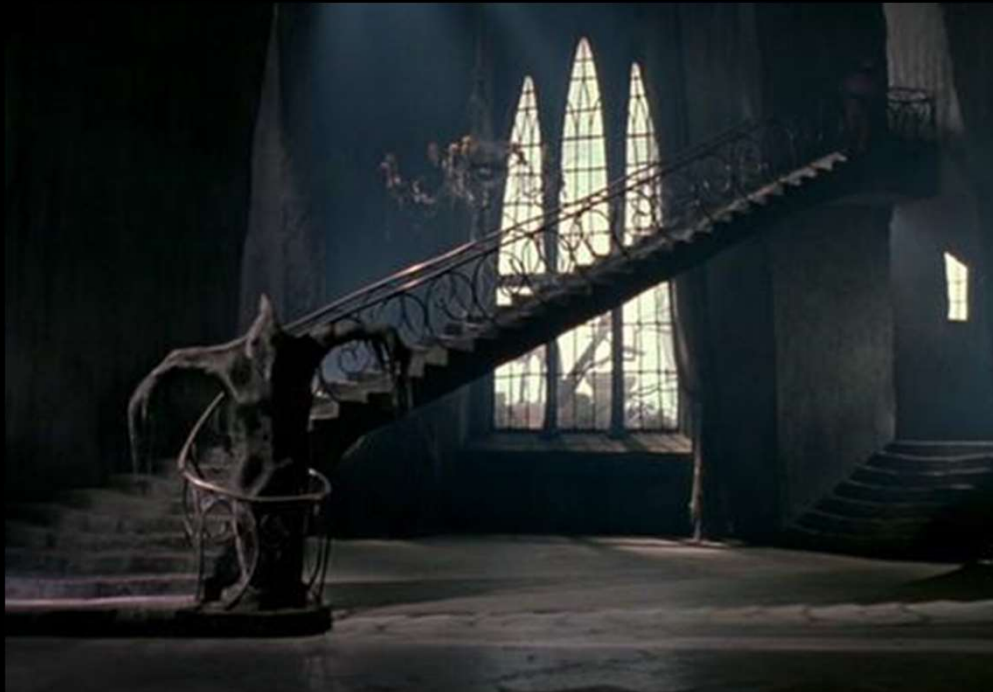

intimidating, bizarre, active
